

# Postdoc position open

UW Medicine Diabetes Institute at UW South Lake Union. 750 Republican Street, F640

To apply please email  
your CV to  
[apv4@uw.edu](mailto:apv4@uw.edu)

The **Valencia lab** is dedicated to understanding the relationship between **mitochondria** and nutritional stressors in the context of **metabolic disease**.

The Postdoctoral Scholar will be engaging in exciting new studies on how obesity and weight loss impact the bioenergetics of immune cells.

## Qualifications:

**Background** in immunology research, with knowledge of multicolor flow cytometry and cellular assays. Mouse handling experience and human peripheral blood handling is preferred.

**Strong interest** in learning about metabolism and mitochondria.

Be self-motivated, show initiative, and be willing to independently acquire new skills. Excellent attention to detail, good organization, and communication skills.
